

# AUTO FUSE 12 WAY PANEL

**NEW**

This panel can be used to provide fuse protected power to 12 separate circuits from a single positive common input stud. In addition, this panel includes a 12 way grounding panel with a negative common stud to complete each circuit. The included clear insulating cover provides storage for two spare fuses and features an easy to open push button yellow latch.

Part Number	Description
880066	12 Way auto fuse panel with cover

**Voltage:** 32VDC

**Max. Cumulative Rating:** 100A total.

**Max. Rating per Circuit:** 30A.
